

GREEN FORCE

HYBRID GLOVES USER MANUAL

#passion for innovation

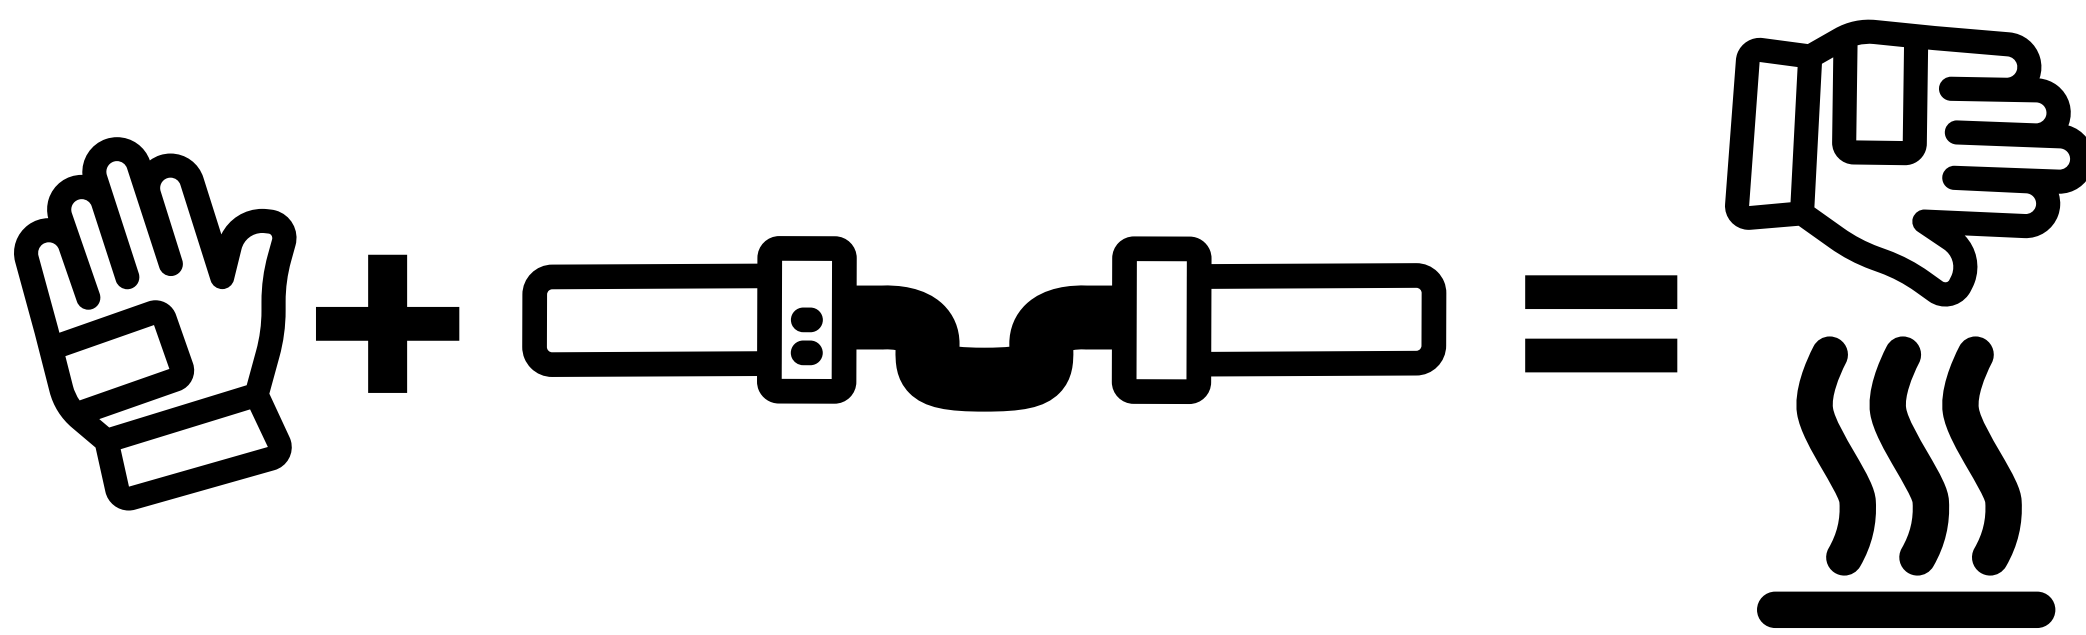

GreenForce thanks you for purchasing its HYBRID gloves, a revolutionary innovation designed, invented, and patented in France.

These innovative gloves provide optimal protection against the cold and, when paired with GreenForce's DUAL GRIPS, become heated gloves, requiring no batteries or wires.

An innovation that embodies our vision: making every ride more enjoyable and safer.

HOW THEY WORK

The DUAL GRIPS (sold separately) transmit an electrical charge to the heating elements integrated into each glove.

- **Electra Pads™**

Technical inserts located on the palm of each glove, ensuring the transfer of electrical charge to the heating elements on the back of the glove.

Their design ensures a stable connection even in extreme conditions (rain, intense cold).

- **HeatFlex Matrix™**

The flexible heating element extends from the back of the hand to the fingertips, with a return path under each finger that wraps around the first phalanx. This design ensures optimal warmth for fingertips, which are especially sensitive to cold, while delivering uniform heat distribution.

The latest-generation thermoconductive wire (aka ThermoWire™) combines flexibility and thermal efficiency, offering optimal freedom of movement and targeted protection where it's needed most.

TECHNICAL FEATURES

- **Full-grain goat leather:**
Soft and durable, offering comfort and enhanced resistance.
- **Amara TouchFlow™ inserts:**
Allow the use of touchscreens without removing the gloves.
- **Silicone grip pattern:**
Anti-slip reinforcements for optimal grip..
- **Finger gussets:**
Enhance flexibility for unrestricted riding.
- **Leather palm reinforcements:**
Provide additional protection against wear.
- **Hipora™ membrane 3000/3000:**
Waterproof, breathable, and windproof.
- **3M™ Thinsulate™ lining:**
Thermal protection that retains heat while wicking moisture.
- **TPU protective shell:**
A thermoplastic polyurethane monobloc for optimal protection.

TECHNICAL FEATURES

- **Adjustable fastening system:**
 - Mk. 1 and Mk. 3: Double fastening with a Velcro® tab on the cuff and wrist.
 - Mk. 2 : Wrist fastening with a Velcro® tab..
 - Mk. 4 : Wrist fastening with a Velcro® tab and waterproof zip.
- **CE Certification – Level 1 KP:**

Complies with EN13594-2015 standards for certified protection
- **ThermoWire™ A GreenForce Exclusive:**

High-performance alloy heating element, delivering ultra-fast, consistent, and reliable heat, even in extreme conditions.
- **ConductThread™ A GreenForce Exclusive:**

Ultra-thin stainless steel conductor that transmits the electrical charge from DUAL grips to the gloves' heating elements, ensuring exceptional comfort and unmatched durability.

CARE INSTRUCTIONS FOR HYBRID GLOVES

To maintain the longevity of your HYBRID gloves and the proper functioning of the heating elements, follow these recommendations:

1. Leather Care

- **Drying:** If damp, gently blot with a dry cloth. Avoid direct heat sources (radiators, stoves) and sunlight.
- **Maintenance:** Nourish the leather with a specialised leather cream to prevent cracking.
- **Preventing internal wear:** Apply talcum powder inside the gloves to protect the heating wires from the corrosive effects of sweat acidity.

2. Textile Material Care

- Clean the exterior of the gloves using a damp cloth and mild soap. Never fully immerse the gloves in water, even for cleaning.
- **Drying:** Gently press to remove excess water and let air dry away from direct heat sources and sunlight.

3. Precautions for Heating Elements

- **Handling:** Handle with care to avoid bending or damaging the heating wires.
- **No machine washing or drying:** Never wash or dry the gloves in a washing machine or tumble dryer.
- **Storage:** Store in a dry place, away from sunlight.

WARRANTY

GreenForce HYBRID gloves are warranted for 24 months from the date of purchase against any manufacturing or material defect, subject to the following exclusions and conditions.

Warranty Exclusions

The warranty does not cover:

1. Normal wear and tear:
Signs of natural or excessive use.
2. Improper maintenance:
Damage caused by incorrect care, including machine washing and drying.
3. Misuse:
Damage resulting from improper use or demanding work environments.
4. Exposure to extreme conditions:
Damage from prolonged exposure to high temperatures, direct heat sources, or intense sunlight.
5. Unauthorised modifications and repairs:
Any interventions or modifications carried out by unauthorised third parties.

WARRANTY CONDITIONS

For any claim, the buyer must provide a valid proof of purchase. GreenForce reserves the right to inspect the gloves before issuing a replacement or repair. Shipping costs are borne by the buyer but will be reimbursed if the defect is confirmed

LIABILITY LIMITATION

The warranty is limited to the repair or replacement of the gloves, at GreenForce's discretion. GreenForce accepts no liability for indirect, incidental, or consequential damages related to the use of HYBRID gloves.

CUSTOMER SERVICE
